## PACKAGE CONTENTS

## HANDSET FUNCTIONS

1

Thank you for your purchasing Audiovox CDMA cellular phone. Please check the product contents by comparing them with the following pictures.

Handset

Desktop Charger

User's Manual

Standard battery

Belt Clip

Portable Loop

Ear-microphone (Option)

## Handset

Check with your local distributor which battery type is supplied as standard. If there are any product defects, please report them to the place of purchase immediately.

## HANDSET FUNCTIONS

## SCREEN DISPLAY AND FUNCTIONS

1

## Function Buttons

This button is used to access the menu.

This button is used to make or receive a call

Press this button to terminate a call or exit the current menu. Press and hold to turn the phone on or off.

This button is used to clear digits and /or texts from the display or exit the current menu.

This button is used to access a sub menu or store set parameter; store names and numbers; view stored or just called numbers; and the Scheduler and Calculator.

These scroll buttons are used to select screen contents.

This button is used to access text and voice messages.

Used to silence Audible Tones In Standby And Mute Conversation.

**Signal Strength**

The strength of the current signal is displayed by the number of bars (0-5).

**Roaming**

This icon indicates the user is outside the normal service area.

**Service / No Service**

When within service area, is displayed. If not, is displayed.

(In Busy) Appears when the line is busy

**Short Message Service**

Blinks when text or voice messages have been received and stored.

**Digital Mode**

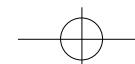

Displayed when the phone is in digital mode.

**Balance of Battery Power**

The balance of battery power available is displayed by the number of bars (0-4).

**Mute**

Used to silence Audible Tones In Standby And Mute Conversation.

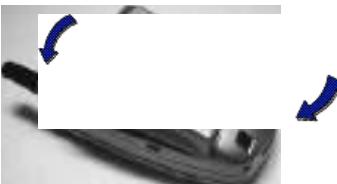

## BATTERY INSERTION AND DETACHMENT

## 1

## Battery Insertion Method

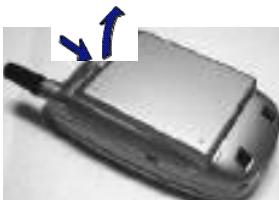

1 As shown in picture , insert the battery to fit into the groove at the bottom of the handset. Then press in the direction of until it snaps.

- The battery must be correctly placed in the battery compartment. If the battery is incorrectly inserted, the handset will not turn on or the battery may slip out.

## Battery Detachment Method

2 Push the handset separation tab with one hand and pull in the direction of to separate.

## CHARGING THE BATTERY

- The battery is not charged when you purchase the product. Use the battery only after it is fully charged.
- Charge your battery when the battery low-voltage alarm sounds.

1 Power Connection  
Connect the charger to a standard 120V AC outlet.  
LED's will blink orange when the power is connected.

2 Charging the Battery Only  
To charge the battery only, insert the battery pack into the charger. LED will indicate charging status.

- Red indicates charging.
- Green indicates charging is complete.

- Battery is not charged when you purchase the product.
- Fully charge the battery before use.

3 Charging the Battery with the Handset  
To charge the battery with the handset, insert the handset into the charger.

- Charging the battery with the handset on is less efficient than charging it with the handset off.

## CHARGING THE BATTERY

## 1

## 4 Charging Completion

Charging is completed when the green-colored light stays on.

- The handset may remain in the charger after the green light is turned on.
- Charge the battery when the battery low-voltage alarm sounds from the handset and the "Very Low Battery!" message appears on the screen.
- When the "Low Battery Warning! Phone is Turning OFF!" message appears on the screen the handset will turn off automatically. Change or charge the battery immediately.

## Time to Complete Battery Charging

Battery Type	Standard Battery
Charging Time	About 200 mins.

## Battery Life (for New Battery)

Status	Type	Standard Battery
Continuous Call		120-150min.
Continuous	Standby	30-60 hours

- The operating times are approximate values and may vary depending on network configuration and handset usage.

## TIPS ON EFFECTIVE BATTERY USE

Use only batteries and chargers approved by the phone manufacturer.

When a charger is not in use, disconnect it from the power source. Do not leave the battery connected to a charger for longer than a week; overcharging may shorten its life.

If left unused, a fully charged battery may completely drain (discharge) in 1 - 4 weeks.

Never use any charger or battery that is damaged or worn out.

Use the battery only for its intended purpose.

Do not short circuit the battery. Accidental short circuiting can occur when a metallic object (e.g. coin, clip or pen) causes direct connection of the two terminals of the battery (metal strips on the back of the battery), for example, when you carry a spare battery in your pocket or purse. Short circuiting the terminals may damage the battery or the connecting object.

Leaving the battery in hot or cold places, such as in a closed car in summer or winter conditions, reduces the capacity and lifetime of the battery. Always try to keep the battery between 41°F and 95°F (5°C and 35°C). A phone with a hot or cold battery may temporarily not work (or charge) even if the battery is fully charged.

Temperature extremes affect the ability of your battery to charge; allow it to cool down or warm up first.

When the battery is not in use, store it uncharged in a cool, dark and dry place.

The battery is a sealed unit with no serviceable parts. Do not attempt to open the case.

It is recommended that you allow your battery to fully discharge before you recharge it.

The battery can be charged and discharged hundreds of times but will eventually wear out. When the operating time is shorter than normal, it is time to buy a new battery.

Do not dispose of a battery in a fire!

Dispose of used batteries in accordance with local regulations.

Recycle!

## BASIC OPERATION

## Chapter 2

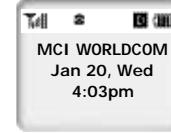

## Basic Operation

This chapter describes the basic operation of the handset.

- ⚡ Basic Operation
- ⚡ How to Adjust Volume
- ⚡ Ringer/Vibration/Light selection
- ⚡ Ringer Type Selection
- ⚡ Adjusting Ringer Volume
- ⚡ Auto Answering
- ⚡ Flip Answer

## How to Turn the Handset On

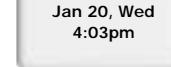

① Hold down [  ] until for 2 seconds.

- If the phone is in Auto Lock mode the " Lockcode? " message will appear on the screen. You must enter the 4-digit lock code to use the phone. You can make emergency calls in Auto Lock mode. Initial lock code will be 0000 (refer to p.51).
- If an error message appears on the screen, contact your local dealer.

## How to Turn the Handset Off

① Hold down [  ] until the phone powers off.

- If the phone does not power on or acts abnormally, remove and reinstall the battery.

## BASIC OPERATION

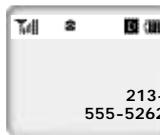

## 2

## How to Make a Call

① Enter the phone number.

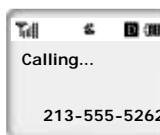

To delete a wrong number, press [CLR] to back up. To delete all entered digits, press [END] or hold down [CLR].

Area Code  Phone Number  

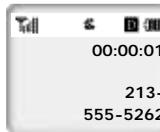

② Press .

- If the line is busy, terminate the call, wait for a moment, then try again.
- The "Call Failed" message will appear on the screen if the call cannot be connected.

③ Start the conversation after the call is connected.

④ To end the call, close the phone or press . If you are using the ear-microphone, press the ear-microphone button shortly.

- To dial the number you have just called, press . If you are using the ear-microphone, press the ear-microphone button for more than 2 seconds.
- If  is displayed, you are in an out-of-service area and cannot make a call.

## BASIC OPERATION

## How to Answer a Call

① Phone rings and the green and red LED on the folder cover flash.

- To change receiver type (Ringer/Vibration/Ringer + Vibration/Lamp), please refer to p 22. Initial setting is "Ringer".

② Open the folder or if the folder is already open, press any key, except  key. If you are using ear-microphone, press the ear-microphone button for more than 2 seconds.

If you press button once in short, the bell sound will stop, twice in short, the function will be some on End

③ Start the conversation.

- Closing the folder while using the ear-microphone does NOT end the call.

④ To end the call, close the folder or press .

- If Auto Answering Feature is enabled, the call will be answered after the preset number of rings. (refer to p 25)

## BASIC OPERATION

## HOW TO ADJUST VOLUME

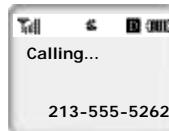

2

## Recalling Last Number Dialed

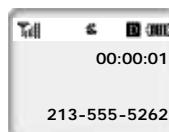

This feature is used to dial the number just called.

① Press [  ] and the phone number you just dialed or the number most recently saved will dial automatically. If you are using ear-microphone, press the ear-microphone button for more than 2 second.

② Start the conversation after the call is connected.

③ Press [  ] or close the folder to end the call. If you are using ear-microphone, press the ear-microphone button once again shortly.

- Closing the folder while using the ear-microphone does NOT end the call.

## Signal Strength

①  The strength of the signal is displayed by the number of bars (0 ~ 5).

## Remaining Battery Indicator

①  The bars inside the battery icon indicate the remaining power in the battery. Fully charged batteries are displayed with four bars. If the battery power expires and needs to be charged, no bars are displayed and an alert beep sounds with a "Very Low Battery!" message.

20

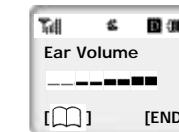

## Using the Volume Button

① Press the volume buttons to adjust the volume.

- Conversation : Adjusts ear-piece volume
- Standby : Adjusts key-tone volume
- Conversation while using hands-free : Adjusts hands-free volume

② After adjusting the volume, press  to save settings.

- The volume setting is automatically saved in 2 seconds after the volume is adjusted.

21

## RINGER/VIBRATION/LIGHT SELECTION

## RINGER TYPE SELECTION

2

This feature is used to select ringer, vibration or Lamp.

① Press .

② Use the scroll buttons to select the receiver type you want.

Correct order in phone

- Ringer
- Vibration
- Lamp
- Vib + Ringer : Vibrates for 18 seconds then the bell sounds

③ Press .

This feature is used to select ringer type.

① Press .

② Use the scroll buttons to select ringer type.

③ Press .

22

23

## ADJUSTING RINGER VOLUME

## AUTO ANSWERING

2

This Feature is Used to Adjust Ringer Volume

① Press [MENU] [2 ABC] [3 DEF] [4 GHI] [5 JKL] [6 MNO] [7 PQR] [8 S TU] [9 V W X] [0] [HANG UP].

To move between the menu items, use the scroll buttons [▲ / ▼] or the volume buttons.

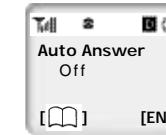

② Adjust the volume by pressing the volume buttons or the scroll buttons, then press [HANG UP] to store the setting.

The call is connected automatically after ringing a set number of times.

① Press [MENU] [2 ABC] [3 DEF] [4 GHI] [5 JKL] [6 MNO] [7 PQR] [8 S TU] [9 V W X] [0] [HANG UP].

② Use the scroll button to select the setting you want.

- 1/2/4/6 Rings : The number of rings before the call is connected automatically.
- Off : Auto answering feature is disabled.

③ Press [HANG UP].

- If the receiver type is not set for " Ringer " the auto answering feature is disabled.
- In hands-free mode, this feature works regardless of the receiver type and whether or not the folder is closed.

## FLIP ANSWER

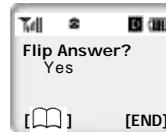

## MEMO

2

This feature allows you to choose whether you want to receive a call by opening the folder. This is particularly useful if you want to see the Caller ID before answering calls.

① Press # .

② Use the scroll button to select the desired setting.

- Yes : Allows you to receive calls by opening the folder.
- No : Does not allow you to receive calls by opening the folder. To receive a call when the folder is closed, open the folder then press any key. except [] key.

③ Press [].

## HOW TO STORE A PHONE NUMBER

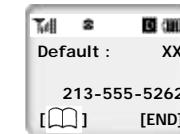

3

Up to 100 phone numbers can be stored in the memory and retrieved by using a variety of ways.

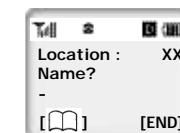

① Enter the phone number you wish to store and press [  ].

- The first available location is automatically displayed.

② To store the number in the first available location displayed, press [  ].

- To store a number at a different location, use the numeric keypad to enter the 2-digit location number desired.
- Locations 90 to 99 are stored with the hidden feature.
- If the desired location already has a phone number stored, the "Overwrite?" message will appear on the screen.
  - To overwrite, press [  ].
  - To store the number at a different location, press [  ].

③ Use the numeric keypad to enter the name for that location. (refer to p30)

④ Press [  ] after entering all the letters.

## HOW TO STORE A PHONE NUMBER

3

## Entering Letters and Numbers

Press the numeric keypad to select the letter.

Keypad	Once	Twice	3 times	4 times	5 times
1	1				
2 ABC	A	B	C	2	
3 DEF	D	E	F	3	
4 GHI	G	H	I	4	
5 JKL	J	K	L	5	
6 MNO	M	N	O	6	
7 PQRS	P	Q	R	S	7
8 TUV	T	U	V	8	
9 WXYZ	W	X	Y	Z	9

- To enter the number "0", press [0<sub>0.05s</sub>].
- To enter special characters, keep pressing [0<sub>0.05s</sub>].  
( ! . ? , - ( ) ' " \* # = \$ \_ + [ ] & @ )

To enter the next letter, press [#<sub>0.05s</sub>].

- The cursor will automatically move left in 2 seconds after a letter has been entered.
- The maximum number of letters is 16.

## To edit entered letters.

- To delete a letter : Press [CLR<sub>0.05s</sub>].
- To delete all letters : Hold down [CLR<sub>0.05s</sub>].

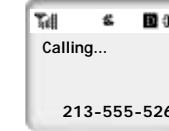

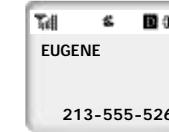

## HOW TO MAKE A CALL USING A STORED PHONE NUMBER

3

## One-Touch Dialing

This feature allows you to make a call with phone numbers stored in the memory location 0 to 9 without having to press the [SEND] key.

1 Hold down the location number for more than 1 second.

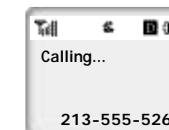

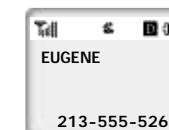

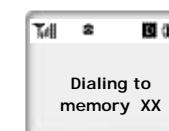

## Two-Touch Dialing

This feature allows you to make a call with phone numbers stored in the memory location 10 to 99 without having to press the [SEND] key.

1 Press the first digit, then hold down the second digit for the location.

- If the location is empty, the 'Empty Location' message appears on the screen.
- If the phone number was stored with the hidden feature, the number is not displayed on the screen while calling.

## HOW TO MAKE A CALL USING A STORED PHONE NUMBER

3

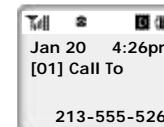

① Press .

- Ten last calls can be seen.

- 1) **Call To** : Displays date and time of the outgoing calls.
- 2) **Called By** : Displays date and time of received calls.
- 3) **Missed** : Displays date and time of missed calls.

The number displayed at the bottom is the caller ID in 2) and 3).

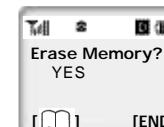

② Use the scroll buttons to select the phone number you want.

- goes to the next number and, goes to the previous number.

③ To delete the stored number, hold down the CLR button for 1 second.

- “Erase Memory?” message appears on the screen. Use the scroll keys to select between “Yes/No”, then press .

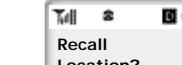

④ To call the number displayed, press .

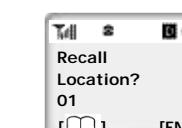

## HOW TO MAKE A CALL USING A STORED PHONE NUMBER

① Press .

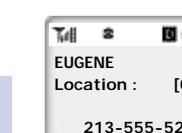

② Enter the two-digit memory location.

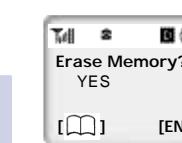

③ Use the scroll buttons to select the phone number you want.

- goes to the next number and, goes to the previous number.

④ To delete the stored number, hold down the CLR button for 1 second.

- “Erase Memory?” message appears on the screen. Use the scroll keys to select between “Yes/No”, then press .

⑤ To call the number displayed, press .

- If the phone number stored with the hidden feature was found, only the name of the location is displayed on the screen and the “Lockcode?” message appears on the screen.
- To view the phone number, enter the 4-digit lock code.

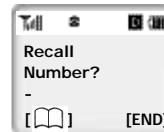

## HOW TO MAKE A CALL USING A STORED PHONE NUMBER

3

## Recalling by Phone Number

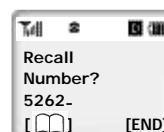

① Press [Speaker] [#] [Space].

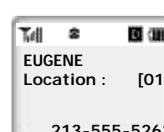

② Enter the phone number (or part of the number) you wish to find.

Press [Speaker].

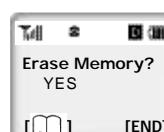

③ Use the scroll buttons to find the phone number you desire.

- [Up] goes to the next number and, [Down] goes to the previous number.
- The first available location containing the entered numbers is displayed.

④ To delete the stored number, hold down the CLR button for 1 second.

- "Erase Memory?" message appears on the screen. Use the scroll keys to select between "Yes / No", then press [Speaker].

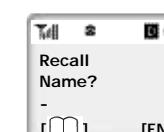

⑤ To call the number displayed, press [Speaker].

## Recalling by Name

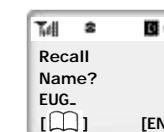

① Press [Speaker] [#] [Space].

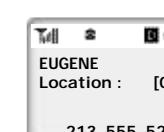

② Enter the name (or initial part of the name) you wish to find.

Press [Speaker].

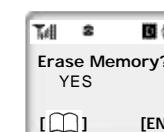

③ Use the scroll buttons to find the phone number you desire.

- [Up] goes to the next number and, [Down] goes to the previous number.
- The first available location containing the entered letters is displayed.

④ To delete the stored number, hold down the CLR button for 1 second.

- "Erase Memory?" message appears on the screen. Use the scroll keys to select between "Yes / No", then press [Speaker].

⑤ To call the number displayed, press [Speaker].

## SCHEDULE MANAGEMENT

3

## Setting the Schedule

① Press  .

- The calendar is displayed. Move to the date you desire then, press .
- The date selected is displayed inverted.
- Moving the cursor
- Up/Down :  / 
- Left/Right :  / 
- Volume buttons : moves between the months
- The calendar can be seen from 1997 to 2010.

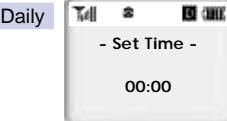

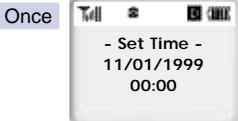

Up to 10 schedules can be set.

② Use the scroll buttons to select the location, then press  or enter the 2-digit location number.

- The first available empty location is displayed.

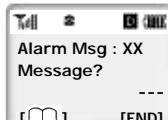

③ Use the scroll button to select the desired setting, then press .

- **Off** : Disables alarm alert.
- **Once** : The melody plays for one minute, then the alert feature is disabled.
- **Daily** : The melody plays for one minute every day at the time set.
- If Etiquette feature is enabled, unit will vibrate.

④ Enter the desired time, then press .

- Enter the desired date in the order, hr:min.

- Enter the desired time in the order hr:min.

⑤ Enter the desired message, then press .

36

## SCHEDULE MANAGEMENT

## Checking and Deleting Schedule

① Press  .

- The first available location with a schedule is displayed on the screen.

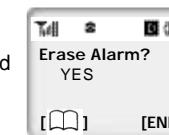

② Use the scroll buttons to check the schedules.

-  goes to the next number and,  goes to the previous number.

③ To delete a schedule, move to the location that you wish to delete, then hold down the CLR button for 1 second.

- "Erase Alarm?" message appears on the screen. Use the scroll keys to select between "Yes / No", then press .

37

## ALARM CALL

## ELECTRONIC CALCULATOR

3

## Editing the Alarm Call

① Press .

② Use the scroll buttons to select the desired setting, then press .

- Off : Disables the Alarm Call
- Once, Daily : The melody plays for one minute. The phone number and "-Alarm Call-" message are displayed, then the Alarm Call is disabled.
- If the Etiquette feature is enabled, unit will vibrate

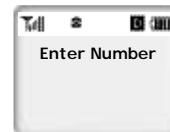

③ Enter the desired time, then press .

- Enter the desired date and time in the order, mm/dd/year and hr:min.

- Enter the desired time in the order, hr:min.

④ Enter the phone number, then press .

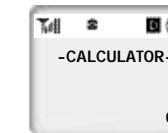

- To call the number displayed on alarm alert, press .

## Calculator

① Press .

② Using the calculator.

- Definitions
  - + : [ ], — : [ ], X : [ ],
  - / : [ ], = : [ ], · : [ ],
- Up to 7 integer digits and up to 2 decimals can be displayed. If the calculated result has more than 7 digits, the result is displayed in 7 digit logarithm.
- There is no (-) sign. To express a negative number, use ' 0-value '.
- To see the help screen, press the volume key, even if you are in the middle of a calculation.

## • Example

To calculate  $128 \times 32 =$

1. Enter 128
2. Press [ ]
3. Enter 32
4. Press [ ]

## CHECKING BIORHYTHM

## 5

This feature allows you to check the biorhythm for today or a specific day by using your birthday.

① Press .

② Press for "Birthday".

- Enter the year/month/day, then press .

③ To check today's biorhythm press 1.  
To check the biorhythm of a specific day, press 2.

- Today's biorhythm can only be checked if time information is received from the service provider.

- The number of days elapsed since the birthday is displayed on the top of the screen, and the physical (P), emotional (E), intelligent (I) quotients are displayed.

• **What is biorhythm?**

Biorhythm is a life rhythm that is governed by three rhythm curves called physical, emotional, and intelligent and starts from within our bodies from birth to death.

⌚ Physical rhythm (P)

This rhythm indicates wide-ranging physical elements related to resistance to diseases, physical strength, adjustment of muscle exercise, speed, physiology, and other basic physical function with a cycle of 23 days.

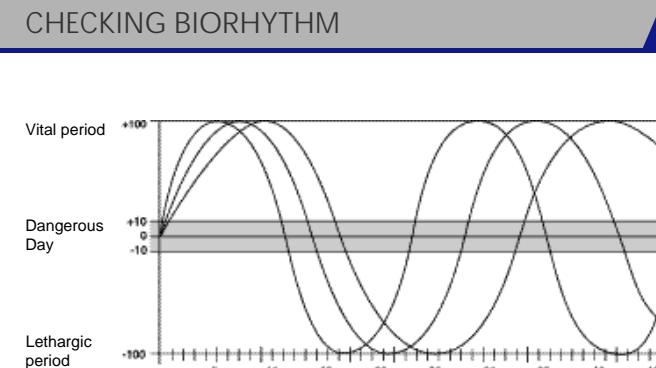

‡ Emotional rhythm (E)

This rhythm indicates creativity, sensitivity, mental health, and recognition about the world and humans with a cycle of 28 days.

鬼 Intelligent rhythm (I)

This rhythm indicates our memory, susceptibility to fright, acceptance of knowledge, and logical and analytic power with a cycle of 33 days.

## CHECKING BIORHYTHM

	Physical rhythm (23 days) (Health and sports rhythm such as weight, stamina, courage etc.).	Emotional rhythm (28 days) (Stability rhythm such as work or love life).	Intelligent rhythm (33 days) (Learning and efficiency rhythm such as memory, ability to analyze, concentration).
<b>Vital period</b>	Suitable for tasks requiring physical strength, travel, intensive sports training. But be careful about overconfidence in your body and overdrinking. Good period for rapid recovery from surgery.	Takes care of works full of vitality. Good time for joint work, love seeking, and dating.	Fast brain activity, lots of mental work. Planning, reviewing. Good time to make decisions about important matters.
<b>Dangerous day</b>	High probability of increased body temperature, occurrence of chronic disease, cold, and headache. Be careful about driving and hazardous situations.	Emotions and nerves are easily shaken. Irritation, slip of the tongue, malicious gossip can worsen the condition of a disease.	Lack of attention and concentration leads to a mistake. Better to postpone important decisions or entering into contracts. Be careful about driving.
<b>Lethargic period</b>	Easily fatigued. Need to refrain from drinking, overeating, and excessive physical exercise. Rest is important. Regular and light exercise will increase your potential power.	Become passive at work. Better not tackle work requiring patience and creativity. Need to take rests and avoid personal relationships and challenges.	Relatively low level mental work. Avoid demanding brain work and courses you are not confident in. Organize materials, notes and cards.

## STOPWATCH

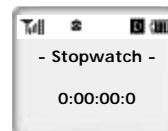

## WORLD TIME DISPLAY

5

## Stopwatch

① Press .

② Use the volume buttons to start the stopwatch.

- Volume Up key : Start/Stop/Split Control.
- Volume Down key : Reset.
